

Monkeypox PARIS DOCUMENTATION: Case Definitions, Not a Case, End Dating

PHSU Case Definition and PARIS Charting

BCCDC Case Definitions

Reporting suspect cases to BCCDC no longer required, but VCH would still like them entered in PARIS (as of June 22).			PARIS ENTRY		
Case Classification	Description	Reporting Timeline	Lab Status (in Lab Report)	Case Type (in Case Interview tab)	Record Status
Suspect	Meets BCCDC suspect case definition	Not Reported to BCCDC	Clinical	Suspected	Other
Probable-pending	Meets BCCDC probable case definition but is pending lab results	Within 48 hrs	Clinical	--	Other
Probable	Meets BCCDC probable case definition and is not pending lab results	Within 24 hrs	Clinical	--	Addition
Lab Confirmed	Meets BCCDC lab confirmed case definition	Within 24 hrs	Lab Confirmed	--	Addition

If the laboratory results come back negative, then the lab status (in lab report) can be changed to “confirmed – negative” and “Not A Case” (see table below).

Non Case, Entered in Error, End Date

Description *	CD Nurse	CD Nurse	CD Nurse	CD Nurse	PA	PA
	Lab Report	Details tab: Case Summary: select NON CASE	Case interview tab: check Not a CASE	Case Summary tab: Disease Outcome: Check NON CASE	Details: Reason for Assessment: ENTERED IN ERROR	Outcome: END DATE
- Lab was marked as “Addition” erroneously (eg. false CD) - Lab result negative	Write on lab once follow-up is completed and no further charting required: “False” or “Neg result” “PA to Enter in Error and End Date”	Y	Y	Optional	Y	Y
- Lab was entered in error, but saved as “Other” - Lab result negative	Refer to above	Y	Y	Optional	Y	Y

* If ‘Addition’ is checked off, the lab is sent to Panorama.

- If ‘Other’ is checked off, it does not get transferred to Panorama
- In both situations, the assessment should be ‘Entered in error’ in Reason for Assessment and End Dated so it a) doesn’t send to Panorama again and b) prevents the assessment from being edited.

1. Details tab: Case Summary: select **NON CASE**

Type	CD ASSESSMENT V2		
<u>Date started</u>	06/11/2020	<u>End date</u>	15/06/2022
<u>Time started</u>		<u>End time</u>	
<u>Reason for assess.</u>	ENTERED IN ERROR	<u>Outcome</u>	NON CASE
<u>Location</u>		<u>Planned comp date.</u>	

2. Case interview tab: check "Not a CASE"

Non-Case

Not a Case ☒ NOTE: If Not a Case, Please Mark 'OTHER' in Lab Tab
